Rom Valley Glass & Glazing brings 30 years' experience to your living space. When it's time for proper glass installations tailored and fitted for your home, no one works with the same seasoned and meticulous craftsmanship.

We are a family-run company with father and son directors, and we've been in the glass industry for over 30 years. In that time, Rom Valley Glass & Glazing has become one of the strongest players amongst UK glass and glazing companies. We've remained on-trend and kept up to date with machines, products, and industry innovations related to home construction, glass installation, and interior design — always adhering to the guidelines set for by the Glass and Glazing Federation.

Rom Valley Glass & Glazing prides itself on exceptional customer service.

We bring customers a knowledgeable staff and highly skilled installers while treating every installation as our own. Friendly, reliable, professional — and offering a vast selection of hardware options, premium products, and bespoke furnishings at some of the most competitive prices on the market.

We invite you to visit our showroom or contact us for an initial consultation or survey.

We'll provide a detailed quotation and, when you're ready to move forward, we'll draw up a contract, book an installation, and complete the work with full FENSA certification and our 7-year guarantee.

We Specialise in Luxury Home Fittings and Installs

Nothing sets a home apart like the right glass window and door design. Looking for that unique trim? That singular overlay? That detailing that resonates with your individual style and makes you distinct from every other home in the area? This is where Rom Valley Glass excels — providing dream components for dream homes.

Over 30 Years of Installation Experience

You scarcely want to entrust your home installations to people without the know-how to do the job right. Many glass installers are fluent with the basic window choices of standardized suburban homes, but ill-equipped to take on more complex or specialized projects. Rom Valley Glass has been in the business for a vast span of years. We're acquainted with the demands of every variety of installation and train our staff to achieve a benchmark level of experience and competence.

With all of our work, Rom Valley Glass meets and maintains the government's regulatory standards.

We provide certification for TrustPilot, CHAS, and Fensa. A Fensa certificate registers your installation with the local council company, which is legally necessary if or when the property is sold. We are accredited to provide this documentation and insure full compliance.
